Standard features

The sushi container is an unheated storage container used to keep seasoned, cooked sushi rice for the preparation of sushi. All units have an insulated body. The interior liner is stainless steel with rounded corners for easy cleaning. Exterior base is black polymer. Choose woodgrain or stainless steel exterior finishes. Lid has a stainless steel exterior with plastic interior, and a moisture absorbant disc to keep rice fresh for up to 2 hours. Rice is kept at the proper consistency for sushi preparation.
